

Salem Asfaw

Software Engineering Student • Full-Stack Developer

Email: salemasfaw7@gmail.com **Location:** Tigray, Ethiopia

Portfolio: salemasfaw.com

Professional Summary

Passionate software engineering student focused on building modern, responsive web applications. I enjoy transforming ideas into real solutions through clean code, continuous learning, and practical full-stack projects.

Technical Skills

Frontend: HTML, CSS, JavaScript, React, Vite

Backend: Node.js, Express.js, REST APIs

Database: MySQL, TiDB

Tools: Git, GitHub, VS Code, Netlify, Render

Featured Projects

AI-Powered Evangadi Forum – Authentication, CRUD, AI-assisted responses.

ChatGPT Clone – Responsive AI chat interface built with React.

Netflix Clone – Modern streaming UI with reusable React components.

Personal Portfolio – React + Express portfolio with backend contact API and Nodemailer.

Journey

Started with very little technology knowledge and learned through discipline, planning, and consistent practice while balancing Grade 10 studies. Continued learning despite power outages and difficult circumstances, building resilience and strong problem-solving habits.

Core Strengths

Problem Solving • Full-Stack Development • Time Management • Continuous Learning • Team Collaboration • Clean Code

Career Goal

Seeking internship and junior software development opportunities to contribute to meaningful projects while growing into a professional software engineer and future computer scientist.
